

## QuickAddress for mySAP™ Business Suite

Inaccurate address data can impact almost every area of your business. Customer relationships can be damaged. Mailings may never reach their targeted audience. Goods may not arrive on time.

### What is QuickAddress for mySAP™ Business Suite?

QuickAddress for mySAP™ Business Suite developed by QAS, is an address capture and cleansing tool designed for use within mySAP™ ERP mySAP™ CRM. Based on data secured from National Postal Authorities, such as the Royal Mail, QuickAddress requires minimal address information to search for and return a full and valid address record directly into the selected SAP page.

### Business Benefits

For mySAP™ Business Suite customers, the core benefits are:

- Fast and accurate data capture
- Validation of customer details being entered
- Consistency of the format data is stored across the whole organisation
- International address data from one single interface
- Increased call centre efficiency – reduces up to 80% of keystrokes required to return a full address
- Reduced data administration costs

### Improve customer communication

QuickAddress for mySAP™ Business Suite will ensure all communications with customers are addressed correctly, ensuring correct delivery and enhancing customers' confidence in your organisation.

### Reduce data administration costs

QuickAddress for mySAP™ Business Suite reduces time taken to enter a full and valid address.

### Improve accuracy of reports

By improving data quality QuickAddress for mySAP™ Business Suite can improve the accuracy of management reports and the results of customer analysis.

### Create a single customer view

QuickAddress for mySAP™ Business Suite can help reduce the number of duplicate records, ensuring a single view of a customer is achieved across a whole organisation.

## Key features

- **Simple searching**

QuickAddress for mySAP™ Business Suite has been designed to be intuitive for users. Even when returning an international address, it ensures the address is accurate and returned in the correct format for the given country. Wildcard and keyword searches enable further flexibility in searching.

- **Seamlessly integrated into mySAP™ Business Suite**

The QuickAddress interface has been developed to generically integrate, with minimal implementation effort, into mySAP™ ERP and mySAP™ CRM.

- **Platform availability**

Solutions are available on both Windows and UNIX platforms.

- **User friendly and requires minimal training**

- **Stable and scalable**
